

Supplementary Table 3. Histology features

	Tubbs	Travis	Individual cases	Total
Histology present	26 (100%)	16 (100%)	63/68 (93%)	105
Filling of alveoli with macrophages	26 (100%)	16 (100%)	61/61 (100%)	105 (100%)
Pigmented macrophages			31/60 (52%)	31/60 (52%)
Interstitial inflammation (chronic)		15 (94%)	33/60 (55%)	48/76 (63%)
Presence of eosinophils		3 (19%)	20/60 (33%)	23/76 (30%)
Increased septal thickening	12 (46%)	14 (87%)	41/61 (67%)	67/103 (65%)
Lymph follicles present	16 (62%)	13 (91%)	19/60 (32%)	48/102 (48%)

Available data from case series and individual cases are presented. Total data are summarized as percentage of available data
